Dear Hiring Manager,

I am writing to express my interest in professional opportunities in software development, quality assurance, or technical support as I prepare to begin Optional Practical Training (OPT) in January 2026. With a background that combines analytical precision, cross-functional collaboration, and multilingual communication, I bring a versatile and adaptable skill set. I am fluent in German and English, and thrive in multicultural, fast-paced environments where clear communication and problem-solving are essential.

During my seven years at P4B Group, I managed multiple enterprise-scale software products throughout the full development and release lifecycle. I coordinated Agile/Scrum teams, facilitating sprint planning, reviews, and retrospectives, while ensuring clear communication between stakeholders and development teams. In addition to designing and executing automated test suites using Nightwatch.js and performing SQL, API, and XML validation, I was responsible for creating business and technical documentation, preparing design mockups and process diagrams, and managing task tracking, quality reviews, and user training sessions. This experience strengthened my ability to bridge the gap between technical execution and business objectives, ensuring each product met both functional and user requirements.

Previously, as a Technical Support Specialist at Siemens Romania, I provided second-level support for PLM software (Teamcenter/NX), assisting engineers with configuration, access management, and workflow optimization. This role gave me a strong foundation in troubleshooting, customer service, and maintaining complex enterprise systems – skills that continue to complement my software development and QA experience today.

I am currently pursuing an Associate of Science in Software Development at Ivy Tech Community College, where I serve as President of the IT Club, Vice President of the Student Government Association, and a member of Phi Theta Kappa. These roles have strengthened my leadership, communication, and teamwork abilities. Outside of academics, I also owned and operated a virtual reality rental business in Romania, where I managed equipment, software configurations, and customer experiences – an entrepreneurial endeavor that deepened my passion for technology and immersive solutions.

As I approach my OPT eligibility, I am seeking opportunities that will allow me to apply and grow my technical and leadership skills in a professional environment. I am particularly interested in organizations that value innovation, learning, and collaboration, where I can contribute to product quality, automation, and customer satisfaction while continuing to expand my knowledge in modern software development and emerging technologies.

Thank you for your time and consideration. I would appreciate the opportunity to discuss how my experience and enthusiasm for technology can contribute to your organization's success.

Respectfully,

Andrei Benea
